- VII.B.2. If the Permittee has good cause to believe that the contamination and site-specific conditions present do not warrant a CMS, the Permittee may, in lieu of a CMS Workplan and within sixty (60) days of the Agencies' acceptance of the Phase 2 RFI Report, submit a proposal for implementing specific corrective measures to the Agencies. The proposal should be a detailed submittal, should be constructed similarly to the CMS Phase 1 and 2 reports described above, should convincingly state the rationale for the proposed measure(s), and should document the effectiveness of the chosen remedial measure(s) in meeting a proposed set of Media Clean-up Standards.

The Agencies will review the proposal. In particular, for situations where there is a well defined "low risk", or where a relatively high quality remedy is being advocated by the Permittee, or where there appears to be few, or perhaps a single straightforward remedial option, a formal CMS may well not be indicated. If the Agencies agree with the Permittee that a CMS is not necessary, and approve the proposal, the proposal will be submitted to public review and comment, instead of CMS Reports. If the proposal is not approved, the Permittee will be directed to either change and re-submit the proposal, or abandon the proposal and submit a CMS Workplan.

- VII.B.3. The Permittee's December 1988 "Initial Assessment of Corrective Measure Technologies" report, undertaken pursuant to compliance with the 3008(h) Order, may be submitted, or referenced, by the Permittee in an effort to comply with the provisions of VII.B.1. and VII.B.2. above.

FAX FORM

Rach. Lated

EPA REGION 10
WASTEWATER DIVISION
100 Sixth Avenue
Seattle, Washington 98101
